As a dedicated Full Stack Developer with 1.5 years of hands-on experience, I specialize in the MERN stack with a primary focus on backend development using Node.js. My passion lies in creating seamless and innovative web solutions that elevate user experiences. Proficient in MongoDB, Express.js, React, and Next.js, I am committed to continuous learning and staying ahead of web development trends.

## EXPERIENCE

### Technical Team

Dharan

ACES

Apr, 2024 - Present

Currently working as a member of the technical team for ACES, a community of Computer Engineering students established in 2070 B.S. My responsibilities include managing technical projects, supporting events, and enhancing the society's digital presence, contributing to the all-round development of students and building a strong foundation for their careers.

### PR And Marketing

Dharan

DELTA

Nov, 2023 - Mar, 2024

As a member of Delta's PR and Marketing team, I actively promoted unity among engineering students from diverse faculties at Purwanchal Campus in Dharan, Sunsari. Through strategic marketing campaigns and engaging public relations efforts, I helped amplify Delta's mission and impact within the student community.

## EDUCATION

### Bachelor's in Computer Engineering

Dharan

IOE Purwanchal Campus

Apr, 2023 - Present

## PROJECTS

### SERENITY SHELF | E-Library

Serenity Shelf is a sophisticated personal eLibrary application developed by dev-sandip. This project enables users to upload and view PDFs seamlessly. By utilizing cutting-edge technologies such as Next.js, React, Express.js, Cloudinary, and MongoDB, Serenity Shelf offers a secure, efficient, and user-friendly platform for managing digital documents.

<https://elibrary.sapkotasandip.com.np>

### Hamro Awaz

Developed the backend for "Hamro Aawaz," a platform designed to address community issues through user submissions resolved by a governing body. Key features include a reward system and profile updates for legitimate reports, profile rank reduction for irrelevant submissions, mandatory government document verification, and an emergency reporting system with penalties for false reports under cybercrime laws. This project was a part of a hackathon.

## ACHIEVEMENTS

### Runner UP at Web Design Competition

I achieved Runner-Up at my college's Web Design Competition, showcasing my skills in creativity, functionality, and user experience. Competing against talented peers, I demonstrated strong proficiency in modern web technologies and innovative design principles, earning recognition for my standout project.
